

Fully Reversible Windows

with the Network VEKA difference...

A revolutionary solution to the complications of window maintenance in multi-storey buildings. With versatile Fully Reversible Windows there's no compromise on looks or performance.

Particularly popular in homes with hard-to-access upper-floor windows, opting for a Fully Reversible solution offers unique and unhindered access to both sides of the window, making them a breeze to clean.

It helps to have a guaranteed expert on your side...

Distinguished by a sash (the opening part of the window) that can be turned completely inside-out, all moving parts remain outside, minimising the chances of any soapy water dripping into the room while cleaning.

The functionality of Fully Reversible Windows makes them incredibly versatile in terms of the varying degrees of ventilation they offer. When closed, however, they boast exceptional weather resistance. Equally adept at keeping the

warmth in, Fully Reversible Windows from your local Network VEKA member offer the same, superior energy and acoustic-insulation ratings of The VEKA UK Group's other double and tripleglazed PVC-U window systems, helping to minimise outdoor noise and significantly reducing your heating bills.

Available in a wide range of colours and woodgrain finishes, Fully Reversible Windows are easily tailored to suit any home. You can even choose, for example, to pair a white interior finish with a woodgrain exterior, should that best complement your decoration or design scheme.

Naturally, all Fully Reversible Windows come with the long-life, low maintenance and insurance-backed guarantees you would expect from Network VEKA.
